Overall we have encumbered about $150,000 of our $264,500 trade allowance, which is 57% of the total. She also gave an overview of the construction items completed since the last Board meeting:

• Laid out interior wall locations and began framing and drywalling
• Landscaped at North, East, and South walls
• Masonry demolition and repair at north wall for new windows and doors
• Removed dedication plaques
• Switched to use the new temporary front doors

Trustees discussed the most recent change orders:
• **Data ports at study room monitors.** These were missed in the design, and gives us maximum flexibility in the private study rooms. Estimated add of $450.
• **Women’s bathroom rework.** We encountered several items in the men’s bathrooms that needed remediation, and expected to find the same when we started the women’s. They have been confirmed, and we need to do some plumbing modifications to meet ADA and rework the floor drain to accommodate the new tile. Estimated add of $2,000 for everything.
• **Column build out.** We discovered a steel column on the north wall that stuck out about 8 inches into the adult space (this is at the point of the 1997 addition). We built out around with drywall. Estimated add of $500.
• **Double wall at vestibule for fire panel.** The fire panel that was specified is very large and needed additional wall thickness to accommodate it. Estimated add of $500.
• **Reading Box newspaper shelving.** I had mentioned this one previously, when we removed the reclaimed wood in the reading box a design for the alcove newspaper shelving was not added. Add of $2,000.
• **Landscaping credits.** There were a couple of small deducts for a revision of plant quantities from construction set and a paver edging substitute. Deduct of $929.
• **Final price on adjusted canopy in front plaza.** When we did our cost reductions the architects said they would reduce the canopy by a certain percentage, but final drawings came later. The canopy needs to be extended slightly to be supported by the column that was installed in Phase 1. Add of $1,100.
• **Existing foundation excavation.** The plumber ran into another existing foundation that needed to be removed when he was excavating channels for plumbing in Room A. Add of $700.
• **Repair underground conduit in parking lot.** We have underground conduit running from the library to the islands in our parking lot. These are private lines and therefore not marked by JULIE. The line to the main parking lot island lights was cut during excavation of the front plaza and needed to be repaired. Add of $1,541.

- **Illuminated area of assisted rescue signage.** This is part of the north wall door hardware permit requirements that are just now getting priced out. Code requires special lighted signage on our egress doors on the north wall. (This doesn’t have anything to do with the panic hardware, just the signage). Add of $1,325
- **Additional outlets at mailroom and staff lounge.** Wall outlets at the mailroom and staff lounge were not sufficient to meet our technology needs, three additional were required. Add of $450.

Tiffany Nash and Dan Pohrte from Product Architecture + Design answered questions about the project and stated that they feel that it is coming along nicely.
