

Public Internet and Technology Policy

Revision Control

- *Adopted by the LPLD Board February 23, 2004*
- *Revision Approved by LPLD Board October 21, 2010*
- *Revision Approved by LPLD Board February 19, 2015*

I. PRIMARY SERVICE GOALS

The Lincolnwood Public Library District provides access to public computers, the internet, and other electronic resources in order to further its mission of offering Lincolnwood residents an expansive and welcoming gateway to knowledge, discovery, and self-fulfillment. In providing such access, the Library Board considers the following goals to be of primary importance:

- To support residents' efforts to find the information, resources, and services they need to lead more successful, productive, and satisfying lives as individuals and citizens;
- To offer Lincolnwood students timely access to the supplementary information, resources, and support they need to succeed in school; and
- To offer Lincolnwood parents and caregivers the opportunity to use computers and age-appropriate electronic learning games and other resources to advance the skills and intellectual capacities of their young children.

II. AVAILABILITY OF SERVICES AND RESOURCES

Unless otherwise noted, full access to library equipment is available on an equal basis to all individuals holding Lincolnwood Public Library cards.

- A. **Internet Access.** The library provides a free, unsecured, wireless network for patron use on personal or library-owned devices during library hours.
- B. **Authentication.**
 - i. Patrons who wish to use library equipment must be entered into the database of authorized users. Authorized users are individuals who hold a valid Lincolnwood Library card in good standing or a borrower's card from another library in the state of Illinois.
 - ii. Guest passes may be issued at the discretion of library staff to visiting patrons and provide limited access to the library's equipment.
 - iii. Parents and guardians may choose to "opt out" of computer use privileges for their child at any time by requesting to do so in person at the library.
- C. **User Agreements.** Patrons must accept the electronic User Agreement every time they connect a device to the wireless network or log on to library computer equipment.
- D. **Time Limits.** In order to provide equitable access to as many users as possible and to better meet the needs of Lincolnwood residents, the library may place limits on the maximum amount of time that individuals may use library technology equipment. Specific time limits are outlined in the User Agreement.
- E. **Location.** Computers and other technology equipment shall be available in both the Adult and Youth & Teen Services areas of the library.
 - i. Computer equipment in the Adult area is reserved for the use of adults and high school aged teens who can work quietly at their respective computers.

- ii. Computer equipment in the Youth & Teen area is reserved for the use of children, younger teens, and the parents or caregivers who have children with them and must remain nearby. In order to best meet the needs of Lincolnwood students, use of computers in the Youth & Teen area may be restricted to homework and other school-related activities during certain hours.

III. FEES

Although there is no charge to use work stations and to access the internet or other electronic resources, users must pay for pages printed, copies, faxes, or other direct costs that may be charged for by the library.

IV. STAFF ASSISTANCE

Library staff will help individuals locate sources of information about how to use computers, computer software, the internet, and other electronic resources. In-depth, personal instruction or training cannot be provided unless offered through a formal technology training program. Time permitting, some brief and very basic assistance may be offered. Although library staff members are available to assist users in judging the reliability or currency of certain websites and other information sources, they cannot provide definitive analyses and determinations about such resources.

V. INTERNET CONTENT

The library has no control over the content, accuracy, or currency of resources accessed on the internet, nor does it have complete knowledge of what is available. Users access the internet at their own discretion. The library encourages users to evaluate information they obtain from the internet carefully. Although there are many highly dependable and extremely useful sites, others may contain unreliable, inaccurate, or out-of-date information, and some may include risky or fraudulent proposals. There are internet sites containing information or images that may be controversial or offensive to some. The library reserves the right to ask users to refrain from displaying computer images that are deemed to be inappropriate and obscene in a public setting, tantamount to sexual harassment, or otherwise incompatible with the goals articulated in Section I above.

VI. CHILDREN'S USE OF INTERNET AND TECHNOLOGY

Consistent with principles articulated in the library's Policies and Guidelines Governing Collection Development and the Selection of Library Resources, the library supports the right of all individuals to access electronic resources and will not deny access on the basis of age. Parents and guardians must assume responsibility for deciding which library resources, including internet sites, are appropriate for their children, and for monitoring their children's use of the library and the resources it makes available. Parents and guardians may choose to "opt out" of computer use privileges for their child at any time by requesting to do so in person at the library.

VII. INAPPROPRIATE AND UNACCEPTABLE USES

Any use that is illegal, endangers library property, or intrudes upon or disregards the rights of other users is unacceptable and will result in loss of privileges and possible legal action. Users will be held financially responsible for any damage caused by vandalism to or willful destruction of the library's

computer network or any component thereof. Examples of unacceptable use include, but are not limited to:

- Conducting illegal activity or accessing illegal materials.
- Harassing another user, or violating another user's privacy.
- Attempting to install or run outside software or equipment on or through library computers or through the library's internet connection.
- Violating computer system security.
- Tampering with computer hardware or software.
- Storing data to anything other than an external storage device.
- Using another individual's identity and authorization to gain access to a computer, or knowingly enabling someone else to do so.

It is the responsibility of the user to respect copyright laws and licensing agreements. All users are expected to comply with the Library Board's Policies and Guidelines Governing Behavior in the Library, which states: "Any behavior by a patron which, in the opinion of staff, unreasonably infringes on the quiet use and enjoyment of the library by others, interferes with library operations and the ability of staff to do their work, or endangers library property, is prohibited."

VIII. CONFIDENTIALITY AND SECURITY OF INFORMATION

User registration records and information about specific computer sessions are considered to be confidential and will not be released to or shared with third parties except as required by law or as absolutely needed to repair, maintain, or gather statistics about the library's computer system. Individuals should be aware, however, that the internet and other electronic resources are not secure, and that others may be able to obtain information from users' computer sessions. The histories of all user sessions are automatically purged from the system at the end of each session. Users should nonetheless exercise caution about entering personal information, such as credit card and Social Security numbers, on library computers and frequently saving to USB flash drives is highly recommended.

Electronic User Agreement
For Use of the Internet and Library Computer and Technology Equipment

I have reviewed, understand, and agree to comply with the various provisions and requirements contained in the Public Internet and Technology Policy.

I am aware that the library has no control over content, accuracy, or currency of resources accessed on the internet; that users access the internet at their own discretion while in the library; and that, if necessary, library staff will ask users to refrain from displaying computer images deemed to be inappropriate and obscene in a public setting, tantamount to sexual harassment, or otherwise incompatible with the Primary Service Goals articulated in the aforementioned policy.

I acknowledge that my use of the library's technology equipment is subject to availability and the following time limits and rules:

Public Computers

- Lincolnwood Residents – maximum of 4 hours per day
- All other users – maximum of 1 hour per day

Laptop Computers and Tablets

- Lincolnwood Residents age 15 and up – maximum of 4 hours per day
- Only 1 device may be checked out to a single user at a time

Express Stations

- All users – unlimited 15 minute sessions
- Staff may ask a patron to vacate an express station at the end of a session if another patron is waiting

I also fully understand, accept, and agree to act in accordance with the following provisions covering inappropriate and unacceptable uses: Any use that is illegal, endangers library property, or intrudes upon or disregards the rights of other users is unacceptable and will result in loss of privileges and possible legal action. Users (the parent/guardian if user is a minor) will be held financially responsible for any damage caused by vandalism to or willful destruction of the library's computer network or any component thereof. Examples of unacceptable use include, but are not limited to:

- Conducting illegal activity or accessing illegal materials.
- Harassing another user, or violating another user's privacy.
- Attempting to install or run outside software or equipment on or through library computers or through the library's internet connection.
- Violating computer system security.
- Tampering with computer hardware or software.
- Storing data to anything other than an external storage device.
- Using another individual's identity and authorization to gain access to a computer, or knowingly enabling someone else to do so.
- Disregarding copyright laws and licensing agreements.
